SKILLS:

Languages: C++, Html, CSS, JavaScript, TypeScript, SQL

Technologies & Tools: ReactJS, NextJS, NodeJS, ExpressJS, MongoDB, Git, GitHub, React Native, VueJS

WORK EXPERIENCE:

ELM Company (Riyadh - Saudi Arabia)

Full Stack Developer | January, 2019 - December, 2023

- Contributed to the development of an ecommerce food ordering website, boosting revenue by nearly 30% and attracting approximately 50,000 monthly visitors.
- Contributed to the creation of a university portal, enhancing the educational experience for thousands of students and educators.
- Managed website development projects from initial design through completion, optimizing all cross-browser and multi-platform compatibility.
- Conducted code reviews, ensuring code quality, adherence to standards, and continuous improvement.
- Partnered with design and product teams to integrate impactful UI/UX enhancements, resulting in optimized user interactions and improved user satisfaction.
- Architected and designed scalable Angular applications, ensuring efficient performance and a robust codebase..

RELEVANT PROJECTS:

Ecommerce Store

- Developed a dynamic e-commerce platform to showcase an extensive range of furniture products.
- Improved user experience by integrating features like advanced filtering, searching, shopping cart, and user authentication.
- Used ReactJS to deliver a modern and responsive user interface, enhancing the overall user experience

Photo Restore

- Created an AI photo restoration website by integrating AI models where users can restore their old and blurry photos.
- Utilized NextJS for seamless integration of both backend and frontend components, ensuring a smooth and intuitive user experience.

Job Management Website

- Created a comprehensive full stack job management platform equipped with full CRUD functionalities.
- Helped thousands of users to efficiently organize and track their job applications in one place.
- Used technologies like ReactJS, Mongodb, expressjs, and nodejs to complete this project.

EDUCATION:

2016-2020 | University of Haripur (Pakistan)

Bachelor of Science - Software Engineering

Relevant Coursework: Introduction to Programming, Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Software Design and Architecture, Advanced Data Structures and Algorithms, Information Security, Software Development and Construction

CERTIFICATES:

Web Development: Completed comprehensive online bootcamp covering key web development technologies and practices, including HTML, CSS, JavaScript, and frameworks like React and Node.js.
